WMS SOFTWARE

The **Strength** of simplicity

Dear customer:

We are very proud of showing you our product catalogue, in which you can find the best solutions to organize and administrate offices, warehouses and workshops.

The products here offered are supported by an industrial organization that owns the most advanced technologies on design and production.

All raw materials used in our productive processes are manufactured and developed in the UE and they satisfy the most demanding quality regulations, calculation codes, they respect the environment and assure industrial safety.

The trust our customers have placed in us has allowed Esnova despite the economical crisis to experiment a significant increase of our annual turnover which evidences that is possible to compete in this business with products manufactured in Europe when we combined technology, innovation and service.

Our Account Managers are always at your disposal to establish a direct relationship, quicker and more efficient as these days require.

We hope that our products will be of your interest,

Sincerely,

A handwritten signature in black ink, appearing to read 'Marco Antonio Fernández Alonso'.

Innovation

Innovation to develop new products and optimizing the existing ones.

Technology

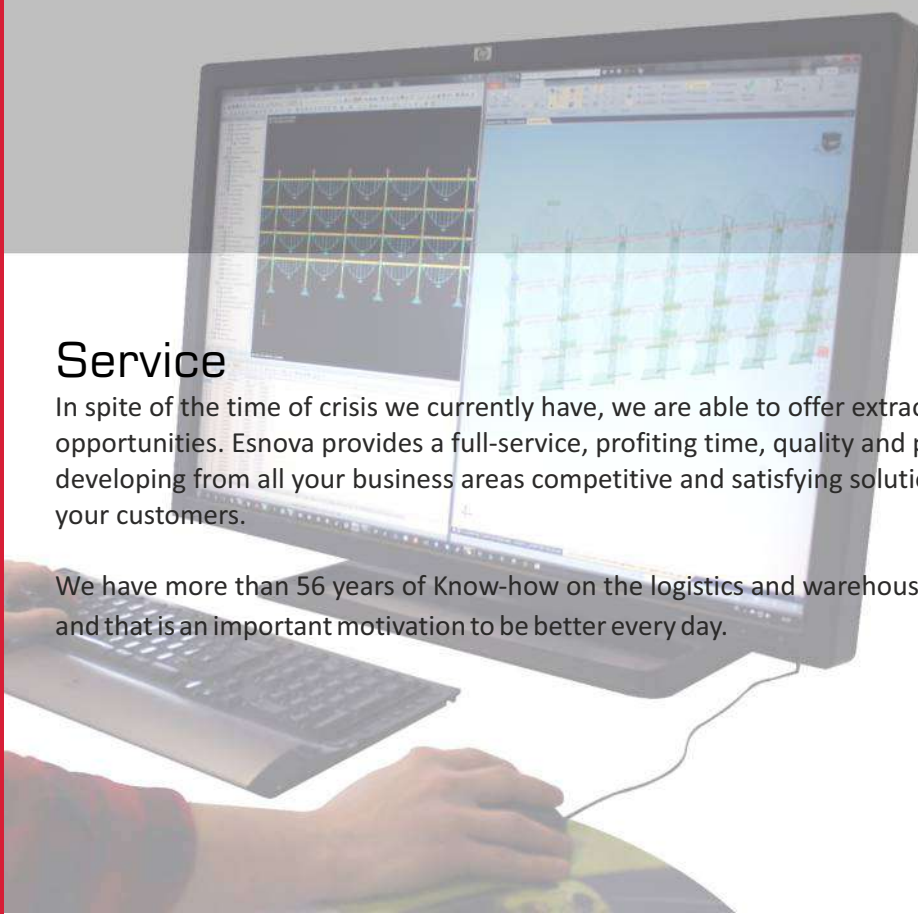

Our machinery at your disposal.

We are equipped with the most flexible and advanced production systems.

Service

In spite of the time of crisis we currently have, we are able to offer extraordinary opportunities. Esnova provides a full-service, profiting time, quality and price; developing from all your business areas competitive and satisfying solutions for your customers.

We have more than 56 years of Know-how on the logistics and warehousing areas and that is an important motivation to be better every day.

Esnova makes exports to 40 countries worldwide.

Angola · Austria · Belgium · Czech Republic
Denmark · Dominican Republic · France
Germany · Guatemala · Ireland · Malt · Morocco · Norway
Panama · Portugal · Uruguay · El Salvador · Switzerland
The Netherlands · United States of America
United Kingdom · Slovakia · Saudi Arabia · Poland
Qatar · Omán · Emirates · Chile · Peru
Bahrein · Kuwait · Jordania · Egypt · Honduras
Indonesian · Colombia · Mexico · Cuba · Hungary · Israel

Quality

Quality as a priority standard is established on each and every process Esnova develops.

The group invests in quality and safety and also promotes environmental respect.

- Quality management system certification (ISO 9001).
- Environmental management system certification (ISO 14001).
- Occupational health and safety management system certification (ISO 45001).
- CE marking certification acc. UNE EN 1090.
- Member of the European Federation of Material Handling FEM/AEM.

A two tier system shelving **Riveto 1**

- This storage system will take advantage of the existing vertical space in the warehouse by creating different shelving floors, which are connected among them by stairs and aisles.
- Modular system. There is the possibility to increase the installation sideways and in depth without no problem.
- It can be adapted to the available space.

Riveto® Light Shelving for AGV vehicles

Esnova adds to its product range a new light duty shelving for the exclusive use of AGV vehicles

AGV Vehicles (Automatic Guided Vehicles) are intelligent industrial vehicles that move without a driver and do not require direct human intervention.

These vehicles are equipped with different guidance systems and a complex control and management system.

Safety and Protection

ANTI-FALL MESH

Electrowelded mesh panels are used as security closings in aisle or transit areas to avoid goods from falling.

PROTECTIONS FOR FRAMES AND UPRIGHTS

Drive In

- Cost effective solution to high density storage.
- Significant feature is that up to 85% of the available space can be used.
- Appropriate system when loading large quantities of like-product.

It is a forklift guidance system that allows work in lanes with more than six meters depth and height.

Post Protector

It is important to protect the bottom of posts and frames.

Load Level Pallet Stopper

This element prevents the pallets from falling at the end of the aisle in a single entry type of drive-in.

Floor Level Pallet Stopper

This element works as an aisle end reference for the floor level in a single entry type of drive-in.

Pallet Entry Guide

This element makes easier the pallet entry and guidance on the aisle, avoiding falls or damage to the goods.

Cantilever Racking

- The main characteristic of the Cantilever Storage System is its capacity to support high volume and length loads.
- It can also be perfectly adapted to the different needs such as variable length and different heights loads. It allows as well to place levels at one or both sides of the central column and its assembly is simple.

Standard dimensions	
Column height (H*)	2500-3000-3500-4000-4500-5000-5500-6000-6500-7000
Arm length (L*)	600-800-1000-1250-1500

* Measures in mm.

Light Cantilever

- A system for storing **light loads** of great lengths or volumes.

Standard dimensions

Column height (H*)	400-500-600-700-800-900-1000-2000-2500-2900
Arm length (L*)	70-80-90-100-120-150-180

* Measures in mm.

Single Frame

Double Frame

Vertical Storage Cantilever

- Storage system designed for long loads or big volume ones in a **vertical** disposition.

The arrangement of the spacer arms can be adjusted to the client's necessities.

Shuttle Cart

- The main feature of our Shuttle Cart System is to facilitate and improve the loading and unloading of goods, without the need for trucks to access the storage aisles.
- The shuttle cart runs on rails, selecting input and output pallets via a remote control.

ASK FOR OUR
PRODUCT
CATALOGUE

Pallet live storage

- Flow racking systems for boxes or pallets.
- Sloped roller truck beds for a perfect motion of the pallets.

Mobile pallet racking

- High storage density.
- The Pallet racking is fitted on rail-guided mobile bases.
- Optimal for high floor prices.
- Perfect for cold storage systems.

Mezzanine floor

- Maximum advantage of warehouse free area, doubling or tripling the surface area.
- Mezzanine floors may be use with elevating systems which enable goods accesability.

CUSTOM
MADE
PROJECTS

Rack clad buildings

THE BEST SOLUTION FOR THE STORAGE IN HEIGHT,
(MORE THAN 40 m. HIGH).

Construction of conventional warehouse building is not required.

Makes de maximum use of available space.

Flexible and adaptable to your storage needs (loading units, dimensions...)

**Automated
systems with
high levels of
productivity**

- The racking is its own building structure (self-supported).

- Designed for high storage.

**CUSTOM
MADE
PROJECTS**

The system elements form a compact block together with the building envelopes and enable the automation of storage processes.

They provide solutions to the most demanding logistical requirements and can achieve high levels of automation with high levels of productivity.

Automated Storage Systems

Manage your warehouse on an automated way and optimize the storage, the picking processes and the shipping of your goods. Maximum stock control, speed up your picking processes and higher efficacy in the inbound and outbound of goods.

- These are high-rise palletised load storage systems whose load units are handled by satellite shuttle carts or stacker cranes.
- This system makes it possible to automate the warehouse by using a reduced number of aisles and increasing storage density.

**CUSTOM
MADE
PROJECTS**

The automation of logistic processes and the storage through technologically advanced automated applications, requires the deployment of industrial racking systems adapted to the requirements and operative specifications of the project.

These systems are very precise solutions that require high quality standards for the racking with very strict tolerances. Esnova makes available to its customers proved quality procedures and a competent human team with extensive experience in the design and installation of racking systems.

Automated Storage Systems - Miniload

Productivity and cost reduction

The automation of the storage systems increases the productivity of your logistic activities.

A reduction of operating costs and damages, as well as an increase in safety can be achieved through higher levels of automation.

Miniload

APPROPRIATE FOR THE STORAGE OF LIGHTS BOXES

Loading units are light boxes. Miniload systems can be operated with stacker cranes for one box per level (uniload), or for multiple boxes per level (multiload).

The storage solution can be designed for storage of boxes in depth operated by stacker cranes combined with shuttle carts. Very high projects can be projected as multilevel miniload solution with 2 stacker cranes in height.

Automated systems for hanging garments

TEXTILE INDUSTRY

Esnova has developed special solutions in the fashion industry for the storage of hanging garments. Hangers can be disposed on rods manipulated by stacker cranes that deposits and collects them from special supports installed on the racking.

Special solution can be developed for the manipulation of hanging garments through aerial transport conveyors disposed on multitier mezzanines.

Esnova incorporates to its product range a new software tool to manage our storehouses in a comfortable, easy and profitable way.

Esnova Software is the warehouse management tool that optimizes all processes (reception, order preparation, shipping), reducing costs and improving the service quality. It is based in an effective and easy managing for any user.

Suitable with other devices

- It decreases up to 90% the risk of errors, resulting in a significant time and money saving.
- It speeds up common procedures as reception, storing, order preparation and shipping.
- It increases the storage profitability and allows control the existing stock in real time.
- Esnova Software is designed to make its use easy and intuitive.
- Is a custom-made tool, adaptable to the needs of each customer.
- Better exploitation of the storage space and merchandise organization.
- Accurate control of the tracking for the different references in the warehouse.
- Using this tool you will be able to analyze your store's statistics, providing decision-making and increasing productivity.
